Electronic Chrome and Grinding Company  
9132 Dice Road  
Santa Fe Springs, CA 90670

Attention: **Mike Reed**

Subject: **Hazardous Materials Business Plan**

Attached is a revised package of forms and supporting information required by the Santa Fe Springs Fire Department for your hazardous materials business plan. Please review and sign the forms where noted. The package should be delivered to Tiffany Shedrick at:

Santa Fe Springs Fire Department  
Headquarters Fire Station  
11300 Greenstone Avenue  
Santa Fe Springs, CA 90670

If you have any questions regarding this submittal please contact us a 626-856-1400.

PACIFIC ENVIRONMENTAL SERVICES, INC.,

  
Dennis Becvar  
Senior Project Manager

City of Santa Fe Springs • Certified Unified Program Agency  
**CONSOLIDATED CONTINGENCY PLAN COVER PAGE**

**FACILITY IDENTIFICATION**

BUSINESS NAME (FACILITY NAME OR DBA) Electronic Chrome and Grinding Company, Inc.

SITE ADDRESS 9132 Nice Road, Santa Fe Springs, CA 90670

**EMERGENCY RESPONSE PLANS AND PROCEDURES**

- A. Your business is required by State Law to provide an immediate verbal report of any release or threatened release of a hazardous material to local fire emergency response personnel (911), the Santa Fe Springs Fire Department, Office of Emergency Services and the National Response Center (H&SC, Section 25507). If you have a release or threatened release of hazardous materials, immediately call:

**FIRE/PARAMEDIC/POLICE  
PHONE: 911**

**INDIVIDUAL(S) RESPONSIBLE FOR CALLING 911**

Mike Reed, Dale Reed, Production Supervisor on Duty

**AFTER** the local emergency response personnel are notified, you shall then notify this Administering Agency, Office of Emergency Services and the National Response Center

	<b>Business Hours</b>	<b>After Hours</b>
Santa Fe Springs Fire Department	(562) 944-9713	(562) 868-1711
State Office of Emergency Services (OES)	(800) 852-7550	(916) 262-1621
National Response Center	(800) 424-8802	

**INDIVIDUAL RESPONSIBLE FOR CALLING THIS ADMINISTERING AGENCY AND THE STATE OFFICE OF EMERGENCY SERVICES**

Mike Reed, Dale Reed, Production Supervisor on Duty

- B. List the local emergency medical facility that will be used by your business in the event of an accident or injury caused by a release of a hazardous material:

HOSPITAL/CLINIC	<u>Presbyterian Inter-Community Hospital</u>	PHONE	<u>(562) 698-0811</u>
ADDRESS	<u>12401 East Washington Blvd</u>	STATE	<u>CA</u>
		ZIP CODE	<u>90606</u>

- C. DOES YOUR BUSINESS HAVE A PRIVATE ON-SITE EMERGENCY RESPONSE TEAM? ☐ Yes ☒ No

If yes, describe what policies and procedures your business will follow to notify your on-site emergency response team in the event of a release or threatened release of a hazardous material. If more space is required, please attach a supplement.

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

**CERTIFICATION: "WE HAVE DEMONSTRATED REASONABLE CARE IN PREPARING OUR CONTINGENCY PLAN. ALL PLANS AND PROCEDURES WILL BE IMPLEMENTED AND SHOULD BE ADEQUATE IN THE EVENT OF AN EMERGENCY INVOLVING OUR HAZARDOUS MATERIALS/WASTE"**

SITE ADDRESS <u>9132 DICE ROAD, SANTA FE SPRINGS, CA 90670</u>	

II. ACTIVITIES DECLARATION	
If your facility does any of the following activities:	Submit Facility Information Form and any of the following applicable forms:

Does Your Facility...		If Yes, Please Complete...
<b>A. HAZARDOUS MATERIALS</b> Have hazardous materials stored onsite (for any purpose) at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids stored in aboveground and underground storage tanks)?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO	4 • CHEMICAL DESCRIPTION FORM (OES Form 2731) • CONSOLIDATED CONTINGENCY PLAN (format not included) • TRAINING PLAN (format not included)
<b>B. REGULATED SUBSTANCES (RS)</b> Have Regulated Substances stored onsite (RS) at greater than the threshold planning quantities established by the California Accidental Release Prevention program (CalARP)?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO	5 • CHEMICAL DESCRIPTION FORM (OES Form 2731) • REGULATED SUBSTANCE REGISTRATION FORM (OES Form 2735.6) • CONTINGENCY PLAN (format not included) • TRAINING PLAN (format not included)
<b>C. UNDERGROUND STORAGE TANKS</b> 1. Own or operate underground storage tanks (UST)? 2. Intend to upgrade existing or install new USTs?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO	6 • UST FACILITY FORM 7 • UST TANK FORM (one per tank) • UST INSTALLATION FORM (one per tank)
<b>D. TANK CLOSURE / REMOVAL</b> 1. Need to report closing a UST that held hazardous materials or waste? 2. Need to report the closing/removal of a tank that was itself classified as hazardous waste?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO	8 • UST TANK FORM (closure section-one per tank) 9 • UST CLOSURE FORM (format not included)
<b>E. ABOVE GROUND PETROLEUM STORAGE TANKS (APSTs or ASTs)</b> Own or operate ASTs above these thresholds: any tank capacity is greater than 650 gallons or the total capacity for the facility is greater than 1,320 gallons	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO	10 • No form is required at this time. However, if you answered yes, prepare and maintain an SPCC plan as part of your contingency plan to address oil spills and releases from the AST(s) at your facility.*
<b>F. HAZARDOUS WASTE:</b> 1. Generate hazardous waste?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO	11 • EPA ID number - provide on this page • WASTE GENERATOR FORM (Santa Fe Springs)
2. Recycle more than 100 kg/mo of recyclable materials at the same location it was generated?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO	12 • RECYCLABLE MATERIALS FORM
3. Recycle more than 100 kg/mo of recyclable materials at an offsite location different from the point of generation?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO	13
4. Treat Hazardous Waste on site?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO	14 • TIERED PERMITTING FACILITY FORM
5. Subject to Financial Assurance Requirement?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO	15 • TIERED PERMITTING UNIT FORM (one per unit) • CERTIFICATION OF FINANCIAL ASSURANCE
6. Consolidate Hazardous Waste generated at a remote site?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO	16 • REMOTE WASTE / CONSOLIDATION SITE NOTIFICATION FORM
<b>G. INDUSTRIAL WASTE/RELEASE REPORT:</b> 1. Store, treat, or discharge any liquid waste into the public sewer system or storm drains other than domestic waste water from restrooms? 2. Are you aware of any hazardous material releases at your facility?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO	17 • Contact Santa Fe Springs Industrial Waste Engineer at 562-944-9713 to determine permit requirements. 18 • Submit a Preliminary Remediation Assessment if required by the Santa Fe Springs Fire Department.

## **SECTION 1**

### **HAZARDOUS MATERIALS BUSINESS PLAN & HAZARDOUS WASTE GENERATOR FOR ELECTRONIC CHROME & GRINDING, INC.**

#### **A. PREVENTION**

Electronic Chrome has an Injury and Illness Prevention Plan that was developed in accordance with the guidelines of California SB198. The primary purpose of the plan is to minimize the hazards to human health or to the environment from: Fires, explosions, or any release of hazardous material or waste constituents to the air, soil, or water. The provisions of the plan will be carried out immediately whenever there is a fire, explosion, or release of hazardous material or waste constituents which could threaten human health or the environment. Secondary containment will be used as required, and, incompatible chemicals will be properly segregated. Tanks, berms, valves, flanges, and associated piping are inspected daily to detect leaks/seepage and to verify the structural integrity.

Material Safety Data Sheets (MSDS) are on file in the main office. A MSDS is on file for every chemical and hazardous material on site. Routine training includes the review of the MSDS for any new chemical brought on site that the employees are not familiar with. All production workers are trained in the proper storage and handling of all hazardous materials. All designated areas used for the storage of hazardous materials are identified and the proper warning signs posted in these areas.

#### **B. MITIGATION**

Most releases or threatened releases of hazardous materials at this site can be contained, or the condition corrected, through the use of a front-end loader, pumps, or vacuum trucks, depending on the quantity and physical state of the spilled or released material. The magnitude of the response will depend on the quantity and type of material spilled. The following steps will be followed

- Emergency Response Procedures will be initiated
- Emergency Coordinator for Electronic Chrome and Grinding will be contacted
- If needed, the evacuation plan will be activated

Isolation procedures will include barricading off solid material spills, and containment of liquid spills through the use of berms and absorbent material. The size of the isolated area will depend on the quantity of material released but will be confined to the smallest area possible.

### **C. ABATEMENT**

During abatement all spilled and released material will be removed. Equipment available on-site will be used. If needed, additional equipment will be brought on site by outside contractors. Any material hauled off site will be transported by a licensed hauler and will either be recycled, reclaimed or disposed in an approved landfill facility.

If an unsafe condition exists, it is the emergency coordinator's responsibility to determine what appropriate action would be taken to safeguard personnel and the environment. All personnel should be removed from the area of concern. If the spill can be safely contained and clean up, it must be performed immediately. If the spill is unsafe or uncontrollable, the supervisor must immediately notify the appropriate local, state, and federal agencies. If any untreated spills enter the sewer or storm water system, the Santa Fe Springs Fire Department must be notified immediately.

### **D. NOTIFICATION AND EVACUATION**

If the event of an emergency the following personnel will be contacted:

**Facility Emergency Coordinator**

**Mike Reed**

562-946-6671

562-943-3474 (residence)

**Secondary Emergency Coordinator**

**Dale Reed**

562-946-6671

562-690-4535 (residence)

**Alternate Secondary Emergency Coordinator**

**Luciano Gonzalez**

562-946-6671

213-212-0195 (residence)

Evacuation of the effected area will be coordinated by the production supervisor on duty for the particular shift. If necessary, the supervisor will also initiate evacuation of the entire facility. Immediately after the personnel have been safely evacuated the supervisor will contact the facility Emergency Coordinator or the Secondary Emergency Coordinator.

## **E. RECORDING AND EVALUATING**

Following containment and control of the situation the supervisor must make sure that all appropriate agencies have been contacted. In the case of a hazardous release, the supervisor is responsible for making sure the following information is gathered.

- The name of the chemical
- Whether it is known to be acutely toxic
- An estimate of the quantity released
- The time and duration of the release
- Where the chemical was released (air, water, land)
- Known health risks and necessary medical attention
- Proper precautions, such as evacuation
- A follow-up notice is required after the emergency. The purpose of the follow up procedure is to update the initial information and describe the action taken.

The emergency coordinator will provide for the collection and disposal of the waste and contaminated materials in accordance with all state and Federal requirements.

The emergency coordinator will assure that all emergency equipment is replaced and restored to operational status.

The emergency coordinator will investigate the cause of the emergency and take whatever steps necessary to prevent a similar situation from occurring in the future.

## **F. PLAN LOCATION**

A copy of this plan is located in the main office, along with the site map showing the evacuation routes.

Emergency telephone numbers, and copies of the evacuation routes are posted throughout the facility.

## **G. EMPLOYEE TRAINING PROGRAM**

Employee training will include the proper handling of hazardous material and in the event of a spill or released, the proper response to the emergency situation. Emergency response training includes the following:

- Procedures for locating, using, inspecting, preparing and replacing emergency equipment
- Emergency communications and alarms
- Response to fire, explosions, spills and release of hazardous materials
- Shut down of operations
- Procedures for evacuation

New employee training includes:

- Handling and storage of hazardous materials including
  - signs
  - labels
  - types of containers
- OSHA right-to-know
- Audio/visual program for general safety
- Location of safety equipment including
  - respirators
  - gloves
  - aprons
  - hearing protection
  - eye protection (goggles and safety glasses)
- Location of first aid supplies
- Training in the use of Material Safety Data Sheets (MSDS)
- Location of MSDS's
- Injury and Illness Prevention Program
- Use of forklifts, hoists, and hand carts
- Emergency procedures

Refresher Training for current employees includes:

- Review of Injury and Illness Prevention Plan
- Review of the proper use of safety equipment
- Review of proper usage of any new safety equipment
- Review of emergency procedures and alarms
- Review of safety procedures for handling any new chemicals or hazardous materials

- Inspection of work areas and review of worker practices
- Feedback and questions from employees
